GOVERNMENT OF MYSORE—ELECTRICAL DEPARTMENT.

OFFICE OF THE CHIEF ELECTRICAL ENGINEER TO THE GOVERNMENT OF MYSORE, BANGALORE.

Notification dated 7th January 1947.

Press Note.

Frequency Conversion Scheme from 25-cy. to 50-cy.

"The attention of all concerned is invited to the Press Notes issued by Government from time to time, giving expression to their intention to convert the supply frequency from 25 to 50 cycles throughout the State except Kolar Gold Fields. This change has to be effected in Bhadravati area covering Shimoga and Chitaldrug Districts during the year 1947 and in other areas during 1948-50.

2. As notified already by Government in Press Note issued during June 1946, it is required that motors installed on or after 1st May 1946 should be suitable for both 25 and 50 cycles. Such of the consumers as have not adhered to the above instructions, should arrange to obtain at their own cost, appropriate equipment in time for utilising 50 cycle power to be made available. Failure to do so will entail disconnection of service, without prejudice to the claim of the Department accruing from the agreement entered into by the consumer with the department.

Equipment installed before 1st May 1946.

3. In case of individual consumers, other than limited liability companies, whose installed capacity is less than 50 H. P., the Electrical Department will bear the cost of conversion, the mode of conversion being left to the choice of the department.

4. In all other cases, the following procedure will be adopted:—

(*a*) In case of motors where reconnection is possible with appropriate changes in the size of pulleys, etc., the entire cost of conversion will be borne by the Department.

(*b*) In case of motors requiring rewinding to suit 50 cycles, the cost of conversion will be borne equally by the consumer and the Department.

NOTE:—If in cases of installations falling under categories (a) and (b) above, the owners desire replacement of their 25-cycle motors by 50 cycle motors, the Department is liable to pay to the owners only such estimated amount as is likely to be incurred in effecting the conversion as suggested above, the balance of cost being borne by the owners.

(*c*) In case of motors requiring complete replacement:—

(*i*) The Department will take over the existing 25-cycle motors, and

(*ii*) The consumers have to pay to the Department amounts equivalent to the depreciation value of the above motors calculated at the rate prescribed in the Mysore Income-Tax Act (v) of 1923 as amended from time to time.

(*iii*) The Department will supply to the consumers new motors of appropriate sizes suitable for 50-cycle power supply.

5. In order to effect this conversion a partial or total interruption of power supply would be inevitable, but the Department will take all reasonable precautions and steps to see, that the inconvenience caused to the consumers is a minimum. It is hoped that the consumers will extend to the Department their whole-hearted co-operation.

6. For any loss that a consumer may sustain during the period of interruption or due to damage to his equipment after the conversion is effected, the department cannot be held responsible beyond the guarantee to be given by the manufacturer or firm or supplier of the motors as the case may be in the three cases (*a*), (*b*) and (*c*) detailed above.

7. Any additional information or further clarification needed on the above points may be had from the Superintendents of Sections of the Department, or from the Chief Electrical Engineer.
